.When you hear the term 'impulse buy' you probably automatically think of the products that pop up on your social media feeds. And that's because you know that you're probably about to be offered something that you've seen and is making you feel

physically happy. However it's a new wave of furniture that seems to be having a similar effect on people, although it's not as clear. That's the work of interior company, Danish company, Bloch Design that's produced a collection of so

called 'micromaterials'.
They're specifically
designed for the home and
the office and we've gone
and had a quick play with
them in each, to see if they
really are the ultimate
thing in impulse buys.
Micromaterials are
designed in minuscule

sizes To be honest the numbers are right.

Micromaterials are designed in minuscule sizes and are typically smaller than your thumb.

That is to say, the most likely thing that we would get hit by is a rectangle.

Unfortunately they aren't

easy to clean up, so you need to be careful about your workspace. There's also the risk of dropping them on the floor, which is, yup, a rectangle. To help us out, Bloch designers have come up with six types of product. We've selected one from

each series as our impulse buy, so, after the break, you can decide which one would be best for you.

There's a beer fridge, a plant box and one each for the office and for the kitchen. Oh, and one for the kitchen. The bookshelf
If you really want to get in

on this trend, then the bookshelf is your best option. The design is rigid, so there are no weak points where you might drop it, and it's also easily moved around if you've got little ones. This is ideal for having five or six different books on the go,

depending on the size of the shelf. As well as the books, you could probably store some drinks or some tins of food. The plant box

The plant box is a bit more of a subtle version of the bookshelf but it's a lot better and less likely to be accidentally nicked. It has

the same rigid structure,
but it's also double
thickness making it less
likely to bend or break.
The only downside is that
if you use
