Download Season 4 Complete.Q: Probabilistic automaton that only accepts a subset of Turing machine languages I'm trying to find a very simple PA that has only accepted subset of Turing Machines. I can't come up with one from what I've read, and that's what I'm looking for. A: Every PA is $\mathbf{decidable}$ via a Turing machine, which simply guesses what state the input is in and halts if the state is final. Since the set of all Turing machines is closed under complementation, we have that the complement of the set of PA is the set of all $\$PA\$$. A simple diagram of the proof can be seen here. Since the power of $\$PA\$$ is relatively close to the power of $\$TM\$$ and $\$PA\$$ are closed under complementation, it is hard to believe that a language that is recognized by $\$PA\$$ is not recursively enumerable. TORONTO -- For the 2015 NFL season, the NFL has taken a few of the biggest hits possible in the wake of the tragedy in Paris, many of them directly related to the growing issue of domestic violence. KANSAS CITY -- A Kansas City Chiefs fan was arrested Wednesday afternoon for allegedly throwing beer at the Indianapolis Colts' team bus as it arrived at Arrowhead Stadium after a loss in Indianapolis. Indianapolis police said they arrested a man who was charged with disorderly conduct and resisting arrest for allegedly throwing beer at the bus as it arrived at Arrowhead Stadium after a 9-7 loss. The fan was in a vehicle which blocked the bus in the event area at approximately 5:30 p.m. ET and allegedly threw beer at the bus multiple times, the Chiefs said. "We continue to monitor this issue and remind our fans that alcohol has
