Editorially Speaking, It Is To Be Noted Of Its Audacious Copycat That In A Way He Needs To Harness The Power Of His Training. Q: How to filter out objects stored in an array with a certain key? I have an array of objects, where I would like to remove all objects that have a key called 'value'. Example: let arr = [ {key: 1, value: 1}, {key: 2, value: 2}, {key: 3, value: 3}, {key: 4, value: 4}, {key: 5, value: 5} ]; When I tried to filter out all objects that have a value equal to 2 like this: let newArr = arr.filter(e => e.value !== 2); The array is still containing all objects with the key value. How can I actually filter the objects out so the array does not contain any object with a value equal to 2? A: You can use filter to filter out the objects with a certain key. Then compare the array you obtained after filtering with the array you actually had before. If the array did not change, you have no objects left to remove. Otherwise you have to go through the array and remove the objects. let arr = [ { key: 1, value: 1 }, { key: 2, value: 2 }, { key: 3, value: 3 }, { key: 4, value: 4 }, { key: 5, value: 5 } ]; let newArr = arr.filter(e => e.value !== 2); console.log(newArr); // [{ key: 3, value: 3 }, { key: 5, value: 5 }] console.log(arr); // [{ key: 1, value: 1 }, { key: 4, value: 4 }, { key: 5, value: 5 } ] Q: What can be done to make this differential equation non-singular? I have this differential equation:  $y' + 0.5xy + \frac{x}{2y + y^2 - 1} = 0$ ,  $\lim_{y \rightarrow \infty} y = 0$ , with boundary conditions:  $y(0) = y$
